

Save a link — get back a *study guide, a briefing, and a quiz*, organized by topic, not by link.

THE PROBLEM

AI didn't kill online learning — it supercharged it. We can reach any lesson on earth. But watching isn't learning: passive video doesn't stick, saved links rot in bookmarks scattered one-by-one, and nothing tests whether it actually stuck.

THE SOLUTION

LearnIT captures a link in seconds, then does the slow work in the background: it reads the source, files it under a durable **topic**, and generates a Study Guide, a Briefing, and an interactive Quiz for that topic. The **topic — not the link — is the unit of study**: every source about a subject is consolidated into one current set of materials that rebuilds as you add more.

CORE FEATURES

- ▶ **Capture 3 ways** — web app, Telegram bot, or auto-captured YouTube playlist.
- ▶ **Topic-level materials** — Guide, Briefing & Quiz per topic, rebuilt atomically as sources arrive; history kept.
- ▶ **Legible pipeline** — every source shows its live stage; failures name the broken step and retry from there.
- ▶ **Daily Telegram digest** — finished work delivered at your local hour.
- ▶ **Private by construction** — per-user isolation enforced by Postgres row-level security.

TRACTION / STATUS

LiveDEPLOYED ON
VERCEL**101**UNIT TESTS
PASSING**69**DB ASSERTIONS
(PGTAP)

HOW IT WORKS

Capture is instant; generation runs on a database-driven job queue woken every minute — so it keeps working with the browser closed.

UNDER THE HOOD

Next.js 16

React 19

Supabase / Postgres

Row-Level Security

Edge Functions + pg_cron

Gemini 2.5

Supadata

Firecrawl

Telegram Bot API

Vercel

WHY IT'S BUILT RIGHT

- ▶ **No key in the browser** — the web app reads/writes only through RLS as the signed-in user.
- ▶ **Fails closed** — the worker rejects any call without its Vault-held secret.
- ▶ **Guardrails everywhere** — daily capture, batch, retry, source & AI-input limits keep the free tier safe.
- ▶ **Cloud-native** — no local scheduler, no laptop; a one-minute Postgres clock drives the engine.
